SUMMARY

Laravel developer with 4.5 years of experience building e-commerce platforms, REST APIs, and business workflow systems (invoicing, billing, multi-step approvals) using PHP, MySQL, and Redis. Comfortable owning a project from database design through to launch; built and launched two e-commerce platforms at Primasoft. Looking for a Laravel / backend-focused role. Available to join immediately.

TECHNICAL SKILLS

Backend: PHP 7/8, Laravel, REST APIs, MVC, OOP, Queues and Mail

Auth and Security: Laravel Sanctum (token auth), role-based access control, CSRF/CORS protection

Database and Caching: MySQL, Eloquent ORM, indexing and query optimization, Redis

Frontend: JavaScript (ES6+), jQuery, AJAX, HTML5, CSS3, Tailwind CSS, Bootstrap

Tools: Git/GitHub, Postman, Composer, npm, Nginx/Apache

Also familiar with: CodeIgniter, JWT, React.js (basic)

PROFESSIONAL EXPERIENCE

Laravel Developer | Primasoft Technologies Private Limited, Chennai *Jul 2025 – Oct 2026*

- Built and launched two e-commerce platforms, each with an admin panel for inventory, product catalog, and order management.
- Developed REST APIs secured with Laravel Sanctum token authentication, covering registration and login, user and admin management, product filters, cart, and checkout. Documented and tested the APIs in Postman.
- Added Redis caching for high-traffic catalog and filter queries, with cache invalidation when products are updated, reducing repeated database load.
- Moved transactional emails (order confirmations and similar) to Laravel Queues and Mail so they no longer slow down checkout.

Software Engineer | 5GX Global Private Limited, Chennai *Feb 2024 – Jul 2025*

- Built a loan valuation platform where banks and verification agencies exchange documents and complete multi-step property appraisals and consultation reports.
- Implemented a 5-role access hierarchy (Case Initiator, Site Engineer, Report Generator, Reviewer, Approver) to run the case approval workflow, replacing manual follow-ups between banks and agencies.
- Developed REST APIs that send finalized valuation reports directly into banks' core systems.
- Built recurring subscription billing with overdue notifications, and a ticketing module with real-time SLA/TAT breach alerts.

Web Developer | Axiom Consulting Private Limited, Chennai *Mar 2022 – Feb 2024*

- Built an accounting and billing system with automated GST calculation, quote generation, overdue receivables tracking, and live profit dashboards.
- Developed an e-commerce site for music software, including two-seat activation-key licensing alongside physical product orders.
- Maintained client web portals and carried out cross-browser testing.

EDUCATION

Master of Computer Applications (MCA), University of Madras, Chennai – 76.65% *2019 – 2022*

B.Sc. Computer Science, E.G.S. Pillay Arts and Science College, Nagapattinam – 75.50% *2016 – 2019*
